## Skills

- **Backend:** Django, Python, PostgreSQL, CodeIgniter, MySQL
- **Frontend:** JavaScript (Vanilla), jQuery, AJAX, HTML5, CSS3, Bootstrap
- **API & Integration:** REST API, Axios
- **Tools:** Git/GitHub, VS Code, pgAdmin
- **Systems:** Server Management, Deployment, Performance Optimization, Process Automation
- **Soft Skills:** Problem Solving, Leadership, Creativity, Project Management

## About Me

As a Full Stack Web Developer, I specialize in building and maintaining web applications using Django, Python, PostgreSQL, and CodeIgniter with MySQL. Experienced in frontend development with JavaScript, jQuery, AJAX, and Bootstrap, I also work with REST APIs and Axios for seamless communication. With strong knowledge in system infrastructure, version control, and process automation, I ensure reliable, secure, and efficient digital solutions.

## Work Experience

### Full Stack Web Developer

**Exponential Technologies** — April 2025 - January, 2026

- Developing and maintaining a **digital Accounting Software product**.
- Building backend features using **Django** and **PostgreSQL** for scalable and secure data management.
- Integrating **REST APIs** with **Axios** for efficient client-server communication.
- Implementing frontend functionality with **jQuery, AJAX, and Bootstrap** for responsive user experiences.
- Collaborating with the team to design, test, and deploy new accounting-related modules.
- Optimizing queries and system performance for **high-volume financial transactions**.

## IT Assistant

Antz Insurance and Services Inc. — February, 2022 – April, 2025

- Configured and troubleshoot network printers via LAN, ensuring seamless printing across the organization.
- Ensured reliable internet connectivity and resolved connectivity issues to maintain uninterrupted access.
- Diagnosed and resolved hardware/software issues on PCs, improving performance and reliability.
- Automated company processes using CodeIgniter, MySQL, JavaScript, jQuery, AJAX, and Bootstrap.
- Monitored ISP performance daily to guarantee stable productivity across the office.
- Developed REST APIs and integrated Axios for efficient client-server communication.
- Utilized Git for version control, developing and deploying secure code to production.
- Managed and maintained server infrastructure, including configuration and updates.
- Implemented and monitored security measures such as firewalls, antivirus, and intrusion detection systems.
- Performed regular backups and disaster recovery operations for data integrity.
- Monitored and optimized system performance and resource utilization.

## Projects

- **Accounting Software (Django + PostgreSQL + Axios)** – Core digital product at Exponential Technologies handling financial modules, client records, and reporting.
- **OCR Autofill Tool (Django + AJAX)** – Extracted text from uploaded documents and auto-filled form fields.
- **Business Process Automation (PHP + CodeIgniter + MySQL)** – Streamlined company workflows, digitized manual processes, and optimized efficiency.
- **Akronpeak.com (PHP, HTML, CSS, Bootstrap, JavaScript, jQuery)**  
– Corporate consulting website featuring a responsive UI, Google Maps integration, and SMTP-based contact forms for reliable inquiry handling.

## Education

Bachelor of Science in Computer Science

Asian Institute of Computer Studies

2017 - 2021
