

RONNEL DARYL RONTOS

Systems Engineer | Full Stack Developer | IT Support

Rodriguez, Rizal | 09928137915 | ronneldarylrontos@gmail.com

PROFESSIONAL SUMMARY

Results-driven Systems Engineer and Full Stack Developer with experience in designing and developing web-based applications, business process automation, and L1–L2 technical support. Proficient in end-to-end application development using PHP, Python (Django), MySQL, and PostgreSQL. Skilled in API integration, CI/CD pipelines, RBAC implementation, and responsive UI development. Experienced WordPress developer building custom themes and schema-driven architectures. Strong background in networking, VLAN management, and cross-functional technical support.

TECHNICAL SKILLS

Languages: PHP, Python, JavaScript, HTML5, CSS3, SQL

Backend: Django, Codelgniter, REST API Design, Webhooks

Frontend: jQuery, AJAX, Bootstrap, Tailwind CSS

Databases: MySQL, PostgreSQL — schema design, RDBMS, query optimization

CMS: WordPress — custom theme development, plugin integration, site architecture

Auth & Security: RBAC, Authentication, Authorization, Role-based Access Control

DevOps: CI/CD pipelines, Git, GitHub, Version Control workflows

Networking: VLAN (D-Link), LAN troubleshooting, Network Segmentation, Active Directory

Tools: XAMPP, VS Code, pgAdmin, Axios, Postman

PROFESSIONAL EXPERIENCE

Systems Engineer / Full Stack Developer • Current Employer Jan 2026 – Present

- ▶ Design and develop web-based applications using PHP, MySQL, jQuery, AJAX, Bootstrap, and Tailwind CSS.
- ▶ Integrate third-party and internal REST APIs; implement webhook-based event handling for real-time data sync.
- ▶ Build and maintain CI/CD pipelines using GitHub Actions for automated testing and deployment.
- ▶ Implement RBAC (Role-Based Access Control) systems including authentication and authorization layers.
- ▶ Develop and maintain WordPress websites using custom theme development, schema design, and RDBMS architecture.
- ▶ Manage version control workflows with Git/GitHub across collaborative development environments.
- ▶ Design relational database schemas and optimize queries for performance and scalability.

Full Stack Web Developer • Exponential Technologies Apr 2025 – Jan 2026

- ▶ Developed and maintained accounting software using Django and PostgreSQL.
- ▶ Designed and integrated REST APIs for frontend-backend communication.
- ▶ Built responsive UI features using JavaScript, jQuery, AJAX, and Bootstrap.
- ▶ Optimized database queries for financial transaction processing.

IT Assistant / L1–L2 Technical Support • Antz Insurance Feb 2022 – Apr 2025

- ▶ Provided L1–L2 technical support for hardware and software issues across the organization.

- Diagnosed and repaired workstation hardware including RAM, storage, and peripherals.
- Configured VLANs using D-Link switches and managed LAN connectivity and network segmentation.
- Managed Active Directory: user accounts, password resets, access control, and group policy management.
- Developed internal automation systems using CodeIgniter, MySQL, and JavaScript within XAMPP.

PROJECTS

Accounting Software Platform

Django · PostgreSQL · Axios · REST API

Business Process Automation System

PHP · CodeIgniter · MySQL · XAMPP · JavaScript

Akronpeak.com

PHP · HTML · CSS · Bootstrap · JavaScript · jQuery

EDUCATION

Bachelor of Science in Computer Science

Asian Institute of Computer Studies | 2017 – 2021
